

Using MDSAS to refer to Burns and Plastics

Online referrals to burns and plastics can be made at:

<http://referrals.mdsas.nhs.uk/>

The direct link for **Burns** referrals: <https://nww.mdsas.nhs.uk/burns/>

The direct link for **Plastics** referrals: <https://nww.mdsas.nhs.uk/plastics/>

- Go through the photo consent form with the patient (kept with the iPad). Once signed, keep a copy for scanning with the notes.
- Complete online referral form via the website entering burns.aeroh@pat.nhs.uk as our email for correspondence whatever the referral type.
- On completion of the form a QR code will appear on the screen.
- Use the iPad (which is kept in the Majors B/Paeds CD cupboard) and open the installed **SiD app** to read the QR code then take and upload images within the app before returning it. (no images are saved on the iPad they are immediately uploaded securely and attached to the referral (alternatively, download and use the **SiD app** on your phone).
- Finish the online form on the computer by printing it from the website by using the button "Save referral export" and (if you wait long enough after using the app) the photos you have taken on the iPad should miraculously appear in the printed document.
- Contact the on-call team (burns or plastics) at either RMCH or SMUHT who will review the referral and photos and advise on the phone regarding actions.
- Ensure the printed referral form is kept with the A&E card for scanning.

Assuming the email address above has been used, confirmation that the referral has been received on the system will come to the email app on the iPad (Password – "roh999").
